

# Energy Management Policy Statement

Established since 2000, ByBox has revolutionised the field service logistics market with its locker technology and innovative supply chain solutions. With hundreds of customers across the globe, ByBox improves engineer efficiency, reduces distribution spend, minimises inventory and increases supply chain visibility.

As such it seeks to provide a safe, comfortable and high-quality working environment, together with adequate supplies and reliable sources of energy and water to sustain its activities, also to procure and manage these supplies and their use in the most cost-effective manner consistent with the organisation's wider objectives and the resources available.

## ByBox is committed to:

- Continually improve energy performance and the performance of the energy management system;
- Providing the necessary management resources to deliver this policy; and
- Compliance with energy management legislation, regulations and codes of practice relevant to its business.
- Support the procurement of energy efficient products and services & any activities that help to design in energy performance improvement to our processes

## It is the aim of this policy to:

- Increase awareness of energy issues and help reduce energy consumption wherever possible;
- Whenever possible to guide the organisation in its decision making with regards to energy performance;

## In order to improve energy performance ByBox will:

- Define specific roles and responsibilities for energy management;
- Set and review energy objectives and performance targets in relation to significant energy use;
- Ensure the availability of information and resources to achieve the objectives and targets;
- Encourage competency in the energy efficient use of plant and equipment;

## ByBox will also:

- Review this policy on an annual basis, taking into account changes in legislation and business operation, to ensure its continued effectiveness.
- Communicate this policy to all employees and ensure they are given the education, training and motivation to conduct their activities in an environmentally responsible manner.
- Make this policy available when requested to other interested parties.
